

## Scrum / Agile Note Sheet

---

### Scrum/Agile Methodology:

---

- 1 Create the following headers: Story, To do, In Process, To Verify, and Done.
  - 2 Write a list of "stories" that need to be added to the project.
  - 3 Relate the "to do's" with each story that they belong to.
  - 4 Move the current "to do" into the "in process" column and start that task.
  - 5 If the current task needs testing, move it to the "to verify" column and test.
  - 6 Once the task is working, move it to the "done" column and move on to the next.
- 

### Making Decisions with a Scrum Team

---

- 1 The Scrum Master is NOT always the one with the final say.
  - 2 If the team all agrees on something, majority rules.
  - 3 There is a debate between team members, who decides the final vote?
  - 4 The team decides on the final vote and works together to find a solution.
- 

### Dealing with Conflicting Developers in a Scrum Team

---

- 1 Although members may disagree and go head to head, they are committed to the team.
- 2 The team needs to work together to find a point of median or a solution to the argument at hand.
- 3 If the committment is not present, that will not be tolerated.
- 4 For a team to work, there has to be committment and a middle ground on which a vote can satisfy both sides.
